

# Flushing Services

Lubricant Analysis | Recovery of Lubricants | Fluid Filtration Service

## Purification Services of lubricants

**VENEFILTER** offers a variety of services that allow the industry to improve its maintenance systems and increase the reliability of its production lines. The global trend is the maintenance of fluids such as lubricants, dielectric oils, process water, etc., in order to reduce consumption, waste to the environment and improve their quality.

**VENEFILTER** has more than 20 years of experience in the treatment and/or maintenance of hydraulic and lubricating oils in general, these being one of its main specialized services. **ASTM D4171-89 y D6439-11.**

### **VENE-CLEAN® & VENE-PURE®**

It has a team of specialized engineers and technicians, who analyze its lubricants and evaluate their applications and uses, in order to recommend the most appropriate treatment. Our field service team has purification units (moisture and/or solids) that treat lubricants contaminated by solids, gases and water, until they reach ISO4406:99 cleanliness levels lower than 11/13/09 and the content of water or moisture up to 9ppm 0.009%. Without affecting their physical-chemical properties, following the procedures ASTM D4171-89 and D6439-11. All this process is executed without affecting the productive process of the company.

ANÁLISIS DE FLUIDOS Y SERVICIOS DE TRIBOLOGÍA

**Servicios de Flushing**

### What is Flushing?

It consists of washing an oil-hydraulic circuit, or lubrication, at a turbulent flow greater than 4,000 Reynolds, during the initial start-up process of an installation (commissioning) or, during a scheduled shutdown, in order to remove metallic particles, welding slag, among others.

### VENEFLUSH®

It specializes in the execution of Flushing services for lubrication, refrigeration, hydraulic turbine systems, compressors and rotating equipment, being leaders in the field, we reach levels of cleanliness of lubricants up to ISO4406 11/8. We have equipment with different capacities that allow us to meet the requirements established in the procedures of: **GENERAL ELECTRIC, SIEMENS - WESTINGHOUSE, SOLAR TURBINE, REXROTH, VICKER.VALMET, CATERPILLAR, HITACHI**, among others, we also comply with ASTM standards: A-380-13, D4174-89 y D6439-11.A-380-13, D4174-89 y D6439-11.

### TRIBO-LABS™

It offers the lubricant analysis and tribology service that the industry requires to apply proactive management in the monitoring of systems, also allowing precise and preventive actions to be taken according to the results obtained. A complete laboratory testing service is offered under ASTM, ISO, SAE, NAS standards, among others. In which it is evaluated: Viscosity, T.A.N.; T.B.N, Oxidation, Additive Package and wear metals, Particle count, Ferrography, moisture (Karl Fisher), among other moisture content, others.

## Our Brands

### VENEFILTER

It is the Exclusive and Authorized representative for Latin America of the most prestigious brands of HY-PRO filtration systems, purifiers and separators; SCHROEDER; TRIBO-LUBE; VENEFILTER; ULTRA-FILTER; DONALDSON; TRIBO-LABS.

“  
**Exclusive distributor**  
of the **Most Prestigious Brands**  
”

## Our Clients

### VENEFILTER

It has achieved 100% satisfaction from our customers. We cover clients in application markets such as the food, power generation, mining, petrochemical, gas, oil, pulp and paper, plastic, beverage, and other sectors.
