Your *full-line* filtration partner

VeneFilter provides comprehensive consulting for separators, depth filters and purification units covering ***water, oils, gases and fuels***. As a full-line supplier, we are a ***single source*** for all your filtration, separation and purification needs.

Our sector specialists bring deep knowledge of process requirements and sustainability goals, and work closely with every client.

COVERAGE

LATIN AMERICA · THE CARIBBEAN · USA · EUROPEAN UNION

With you *from start to finish*

01 · CONSULT
We learn your process, your fluid and your performance targets.

02 · DESIGN
We specify and size the right system for your application.

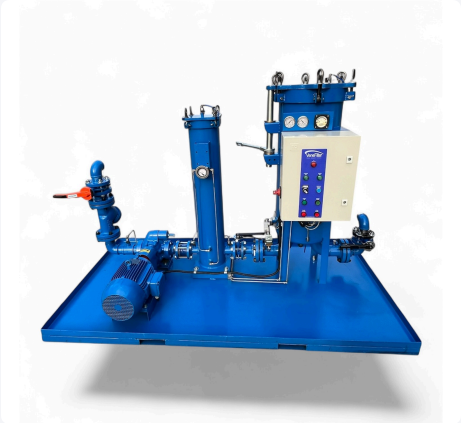

03 · COMMISSION
We integrate and start up the system at your plant.

04 · SUPPORT
We stay with you through ongoing technical support.

Our *7 commitments*

01 Technology enhancement
02 Customized solutions
03 Operational efficiency
04 Product dependability
05 International support
06 Collaborative problem-solving
07 Innovation culture

Filtration system *types*

01

Modular integration *skid*

Multiple filtration stages for manual operation, from prefiltration to final filtration.

- Pre-mounted valves and manometer
- ASME and ISO compliant
- Hygienic design
- CIP compatible

02

Full flow system *integration*

Designed around VeneFilter absolute filter media and high-efficiency elements for clarification, trap filtration and cold sterile filtration.

- Water and wastewater
- Beer and wine
- Process fluids
- High-efficiency elements

03

Cross flow integration *system*

Fully automated clarification and stabilization, with tangential flow and integrated smart sensor technology.

- Multi-stage prefiltration
- Touch panel
- Over and under-pressure protection
- Automatic backwash and dual tanks
- Dry running protection

Key *offerings*

01

Customized solutions

We work closely with every client to develop the optimal filtration system for their product, process conditions and performance targets.

02

Application expertise

Sector specialists who know industrial processes, regulatory requirements and sustainability goals, so the right technology fits every application.

03

Leading technology

World-class filtration with high-efficiency elements: absolute retention ratings, long service life and consistent performance in the most demanding environments.

Brands we *represent*

HY-PRO · Schroeder Industries — Advanced Fluid Conditioning Solutions® · Donaldson Filtration Solutions · TribcLab

Ready to design your *filtration system*?

Our engineers specify, size and integrate the right filtration solution for your exact process conditions.
