

# VF Series Polyethersulfone Membrane PS4

Filters great technological development and high capacity

## SERIES VFPS4 High technology

Venefilter formulates this filter pleated polyethersulfone membranes with microelectronic grade, for the purpose of develop the latest technology in terms of ultrapure water filtration. The filters are inherently hydrophilic and contains no added surfactant or wetting agents any sort resulting contaminants. It offers superior flow characteristics, high contamination retention capacity and constant removal of particles.

### Features

- Absolute retention efficiency.
- Manufactured, flushed, tested and packaged, in an ISO Class 7 Cleanroom Environment.
- Filters are 100% flushed with 18 MΩ-cm DI water and integrity tested.
- Available in a variety of end cap/adapter configurations to fit all industry-standard housings.
- Pore size, lot and serial number are stamped on each filter element for identification and traceability.

### Operating Conditions

Maximum differential pressure	60 Psid a 80 °F (4,14 bar a 27 °C) 30 Psid a 160 °F (2,07 bar a 71 °C) 15 Psid a 203 °F (1,03 bar a 95 °C)
