

VF Series Polyethersulfone Membrane PS5

Economic filtration and high performance

SERIES VFPS5 High performance

Venefilter Inc., Develops this pleated membrane filter, hydrophilic, asymmetric polyethersulfone membrane and polypropylene components, to achieve an economic and filtration with excellent results in terms of flow rates and performance. These are of great strength and durability, is non-fiber releasing, contains no added tensioactives that contribute with the extractables and have a long service life.

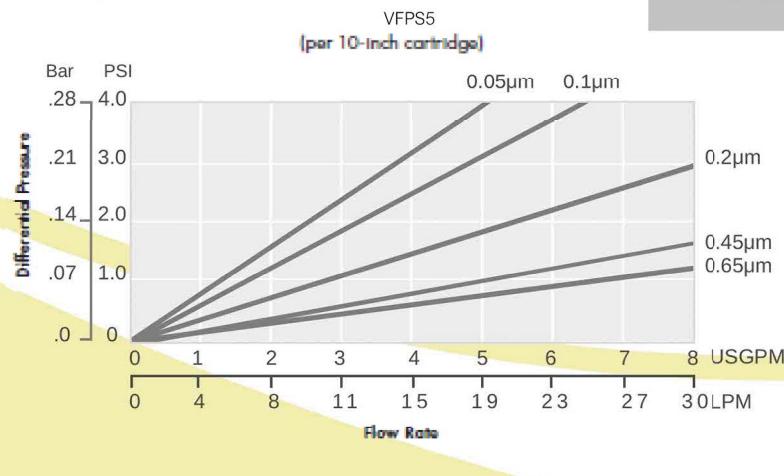

Features

- Absolute retention efficiency.
- Low pressure drop reduces energy costs.
- High dirt holding capacity minimizes change-outs and down time.
- All thermal bonded construction with no adhesives.
- Available in all common configurations to allow use of existing filter housings.
- Cost effective absolute filtration.
- All materials are listed by the FDA for contact with food and beverages.
- Meets USP Class VI, biological test for plastics.
